

Large Polycarbonate Wall Case

The Polycarbonate Wall Case is a durable, clear polycarbonate cabinet that is designed to hold Bleeding Control Kits or Throw First Aid Kit (TFAK) for use by immediate or first responders. The cabinet provides physical and environmental protection to your medical supplies, while still being easy to access and highly visible. An easy to use thumb lock keeps the cabinet secure, but accessible and a eyelet can be used for a safety seal to ensure contents have not been tampered with. Every cabinet comes with a large identifying decal for quick recognition in an emergency.

Dimensions:

- H 14.2 in. x W 12.2 in. x D 6.44 in.
